

CPE-630

Rotational Casting Machine

BJB Enterprises, Inc. has developed a line of quality rotational casting equipment to meet the needs of our customers. Exceptionally beneficial for prototyping “blow-molded” type products or parts that would normally require a complicated core.

- Ⓒ 2.5' x 3.5' Mold mounting platform designed to provide enhanced safety.
- Ⓒ Totally enclosed dual motor drives using variable speed AC motors.
 - Main drive: 1/2 hp
 - Arm drive: 3/8 hp
 - 220v-230v single phase
- Ⓒ Rotation Speeds
 - Main AXIS: 0 to 17.5 rpm
 - Arm AXIS: 0 to 14.5 rpm
- Ⓒ Independent axis controls with forward, reverse, and precise speed control.
- Ⓒ Built-in Timer Control
- Ⓒ Safety Feature – Clear acrylic safety guards (all 4 sides) with emergency stop monitoring system developed in accordance with ANSI safety requirements that apply to this type of machine.
- Ⓒ Can be customized to meet your specifications; quotations upon request.
